Profile

Engineering student specializing in Big Data and Artificial Intelligence, focused on scalable data pipelines, real-time streaming architectures, and AI-driven systems for predictive analytics and decision-making. Passionate about large-scale data processing, machine learning, and data science, continuously improving skills in data modeling, visualization, and intelligent systems to build innovative and efficient solutions.

Education

First-Year Engineering Student in Big Data and Artificial Intelligence 2025–2026

National School of Applied Sciences of Tetouan

Integrated Preparatory Classes 2023–2025

National School of Applied Sciences of Tetouan

High School Diploma, Physical Sciences 2020–2023

Alkhawarizmi High School, Ouezzane

Technical Skills

- **Programming Languages:** Python, SQL, Java
- **Big Data Ecosystem:** Hadoop, Spark, Kafka, PySpark, Hive, Airflow, Flink, Talend, Perfect
- **Modern Data Stack:** dbt, Databricks, Delta Lake
- **Databases:** MySQL, Oracle, Snowflake, MongoDB, PostgreSQL, ChromaDB
- **Containerization & Orchestration:** Docker, Kubernetes, Docker Swarm
- **Development & Deployment:** Django, Flask, FastAPI, REACT, Neo4j, Prisma
- **Visualization & BI:** Power BI, Tableau
- **Version Control:** Git, GitHub, DVC
- **Operating Systems:** Ubuntu Server, Linux

Certificates

- **Deep Learning Specialization:** (deeplearning.ai)
- **Machine Learning Specialization:** (Stanford)
- **Generative AI with Large Language Models:**(aws)
- **SQL for Data Science Specialization:** (UC Davis)
- **Big Data with Spark and Hadoop Specialization:** (IBM)
- **Data Engineering Specialization by DeepLearning.AI:**(aws)
- **Python Specialization:** (University of Michigan)
- **Data Analysis with Pandas and Python:** (Packt)
- **Kafka Fundamentals:**(Kafka Fundamentals)
- **Oracle cloud infrastructure**(Oracle)
- **Understanding artificial intelligence**(Datacamp)
- **Generative AI: Introduction and Applications** (IBM)
- **Developing AI Applications with Python and Flask**(IBM)

Projects

- **Real-Time Customer Behavior Analytics and Recommendation System:** Built a real-time Big Data pipeline using Kafka, Spark, NoSQL databases, and machine learning to analyze customer behavior and deliver dynamic recommendations.
- **Movie Recommendation System:** Built a hybrid movie recommendation system using deep learning, combining collaborative and content-based filtering to deliver personalized recommendations.
- **Real-Time Energy Platform Development:** Built a real-time energy analytics platform for smart cities using Kafka, Spark Streaming, MongoDB, and Power BI to monitor consumption and generate optimization recommendations.
- **Tourism Web Application:** Developed a tourism web application using Node.js, React, PostgreSQL, Prisma ORM, Docker, and REST APIs for destination discovery and recommendations.
- **Predictive Maintenance of Hard Drive Failures:** Built a machine learning-based predictive maintenance system to detect potential hard drive failures and improve system reliability.
- **Automated student onboarding system:** using Linux, scripting, and databases for user provisioning and environment configuration.
- **Sentiment Analysis System:** Built an NLP-based machine learning system to classify text sentiment and extract insights from textual data.

Professional Skills

- Team Leadership and Project Coordination
- Communication, Collaboration and Efficiency
- Adaptability, Problem-Solving and Critical Thinking
- Strategic Planning and Data-Driven Decision Making

Languages

- **Arabic:** Native
- **English:** intermediate
- **French:** Pre-Advanced

Extracurricular

- Member, AI Geeks Club, cyberguardient
- Interests: Politics, History, Sport, new technologies
